

**AFFIDAVIT (SAMPLE - DRAFT ONLY)**

The State/Country of \_\_\_\_\_ )  
  ) solemnly sworn  
The County of \_\_\_\_\_ )

I, \_\_\_\_\_[name], of \_\_\_\_\_[address], State, Country, MAKE OATH AND SAY THAT:

1. The following facts are within my personal knowledge.
2. In 1998, I began to have heating sensations and headaches upon using a cell phone. After several months, I ceased using a cell phone and never experienced these symptoms again. Cordless phones in others’ homes produced similar symptoms with usage, so I never purchased a cordless phone. I did not mention these experiences to my children.
3. When a cell tower was placed next to my home in 1999, my children could not sleep, and everyone in the family had headaches. Within a few weeks, we had measured the RF/MW radiation and found its directionality, indicating all of the measurable radiation was coming from the tower. Measurements were below FCC guidelines. When we placed multiple shielding materials on the side of the house where the tower was and cut the radiation down by 1,000x, the symptoms subsided.
4. Wifi was installed with cords (wires) in my children’s schools in 2002. They had no problems with it. When however the wired wifi was removed in 2006 and wireless wifi installed, my children had serious cardiac problems, including sudden arrhythmias that occurred only when in school. They also had headaches, difficulty concentrating, and memory problems. We removed them from school and there was no further problem.
5. In 2008, family members began experiencing sleeplessness, headaches, memory impairments and cardiac arrhythmias again. Upon measuring, we learned the neighbor had wifi turned on 24-7. We provided the neighbor RF radiation measurements. He then rewired his wifi, and disabled the wireless function; and our symptoms subsided.
6. When two “smart” meters were installed against our specific refusal of them in 2011, the entire family had even worse symptoms than before. We moved from our home to live in an RV in an area of woods that is currently rather free of RF radiation. We now do not use electricity except minimally by day; therefore we are not at all connected to it by night. By living in this manner, we sleep well and have no neurologic or cardiac problems.
7. Various physicians have documented our symptoms and diagnosed us with related conditions, including Electromagnetic Sensitivity. In 2012, a case study pertaining to my children was published in the peer-reviewed journal: \_\_\_\_\_ . [Exhibit 1]
8. FCC admits it has consulted with industry-funded groups including ICNIRP and IEEE, in order to set exposure guidelines. These guidelines, per many studies, even those chosen by ANSI-IEEE in 1991, show adverse effects at exposure levels far below FCC guidelines.
9. The most recent review by a large group of independent scientists, *Bioinitiative 2012*, concurs. [Exhibit 2]
10. All biological organisms are subject to adverse effects from the current ambient levels of EMR; and this is killing the bees and birds per these studies: \_\_\_\_\_ [Exhibit 3]

11. FCC has acted as an industry-promoting agency that has repeatedly injured the public and its interests. However, by law, FCC must act as a regulatory agency, and revise its guidelines to be many orders of magnitude stricter, in order to protect and stop harming the public health and safety and the environment. FCC must act to protect the most vulnerable.

Signed this \_\_\_th day of [Month, Year],
